PACESETTERS

ATLANTA'S 50 FASTEST-GROWING PRIVATE COMPANIES

48 CAB Incorporated

During its 25-year history, CAB Incorporated has grown to be a leader in the supply of specialized steel and iron components used for everything from harnessing the wind to moving water.

And CAB has found the demand for its services is only getting stronger. "What a ride it's been! We've had some very strong growth in the wind energy industry as the country recognizes the need to develop alternatives to foreign oil. We are North America's leading supplier

of steel flanges for the wind turbine towers going up around the country. We import these flanges from overseas and we are able to produce, modify and warehouse them at our manufacturing facility in Texas," said CEO Terri Jondahl.

In addition to its demand from utility wind farms, CAB is also the largest supplier of steel pipe flanges for the water and wastewater industry and has a cast and forged iron and steel product line.

CAB has a staff of 46.

In addition to its U.S. facilities, CAB has offices in China, India, South Korea and South Africa, which allow it to maintain close quality control oversight of its ma-
